Work Experience

Manual and Automation test engineer - SureTrust Jul 2025 - Present

Accounting Software, Penetration Testing, User Story Writing, Sprint Planning, Agile Methodologies, Selenium, A/B Testing, Postman

I have done internship of software testing in that I have done manual, automation testing, I worked with salesforce and Jira applications and in testing I created testcases, scenarios, test plans and more.

Technical Projects

Web Application Testing (AI-CERT) 2025

Manual testing

- Performed functional and regression testing on an e-commerce demo site (<https://v2learner.aicerts.ai/>).
- Designed 20+ test cases, logged bugs in JIRA, and verified fixes through retesting.

Automation Testing (salesforce) 2025

Selenium Extension, python, TestNG

- Automated login feature tests using data-driven framework.
- Practiced on <https://swe106.sfdc-cehfhs.salesforce.com/>

Mobile Application Testing – (Pram Edu App) 2025

Tested a live educational mobile app for 60 days covering all major features and workflows. Performed functional, UI, and regression testing on Android devices, logged defects, and collaborated with developers for issue resolution. Tools used: JIRA, Excel, and test link.

Education

SAGE University
